

# Voltanex

---

## Basic Information

- **Founder:** Gobinda Prasad Paudel
- **Founded on:** February 05, 2024
- **Location:** Nepal
- **Email:** info@voltanex.com
- **Industry:** Electronics, Software, Artificial Intelligence, Embedded Systems

## About Voltanex

Voltanex is a pioneering technology company that seamlessly integrates electronics, intelligent hardware, and advanced software systems. Our mission is to build smart, embedded platforms that leverage artificial intelligence to drive automation, connectivity, and sustainability.

Founded with a vision to nurture dreams for the betterment of humanity, Voltanex stands at the intersection of logic and innovation. Whether it's building wireless embedded devices, AI-powered tools, or scalable digital infrastructure, Voltanex is committed to delivering technology that empowers and evolves.

## Vision

To become a global leader in intelligent embedded technologies and shape the future through innovation in electronics, AI, and software systems.

## Mission

To develop reliable, scalable, and intelligent hardware-software solutions that enhance lives, empower industries, and inspire change.

## Core Focus Areas

- Embedded System Design and Research
- Artificial Intelligence Applications
- Software Solutions for Real-Time Systems
- Wireless Electronics
- Human-Centric Technological Innovations

## Slogan

*"Wiring the World with Intelligence."*
